Tracing Aa to Zz — Capital Letters

A dotted-line tracing sheet for all 26 capital letters, one small set at a time.

Name: _____ Date: _____

How to use this worksheet

1. Trace over the big outline letter with a pencil or crayon, following the direction of the strokes.
2. Once you're confident, write the same letter on your own in the empty box below it.
3. Take your time — there are five more pages, one for every few letters.

This is what a tracing letter looks like — an outline you can follow with your pencil. Every page from here has six of these to practise.
